EDUCATION

Government Engineering College (GEC) Bhavnagar <i>Bachelor of Engineering in Information and Communication Technology (ICT) 5th.Sem.SPI8.09</i>	Bhavnagar, India 2024 – 2027 (Expected)
Sir Bhavsinhji Polytechnic Institute <i>Diploma in Information Technology</i>	Bhavnagar, India Feb 2021 – Aug 2024

TECHNICAL SKILLS

Languages: C, C++, Python, PHP, JavaScript, SQL, HTML5, CSS3
Frameworks: Laravel, Livewire, Tailwind CSS, Bootstrap, jQuery
Core Concepts: Object-Oriented Programming (OOP), MVC Architecture, RESTful APIs, Responsive Design
Developer Tools: MySQL, Git, GitHub, VS Code, AJAX, PDO

KEY PROJECTS

EventFlow Ticketing Engine | PHP 8, MySQL, AJAX, Tailwind CSS

- Engineered a scalable full-stack ticketing platform using **Native PHP (OOP)** and **MySQL**, utilizing secure **PDO** prepared statements to eliminate SQL injection vulnerabilities.
- Implemented a **Dynamic Pricing Engine** using **AJAX** to calculate multi-tier ticket costs (Adult/Child) instantly without page reloads, improving user retention.
- Developed a secure **Role-Based Access Control (RBAC)** system to protect sensitive admin dashboard routes and API endpoints.

Griha Dwar - Real Estate Platform | Laravel, Livewire, MySQL, Tailwind

- Built a comprehensive brokerage application featuring a **Livewire**-powered real-time search engine with dynamic filtering and pagination for properties.
- Architected a secure access system distinguishing between Admin, Agents, and Visitors, implementing middleware for route protection.
- Designed an optimized image management system using symbolic linking and relational database schemas to handle high-resolution property galleries efficiently.

PROFESSIONAL EXPERIENCE

Strats360 Technolabs LLP <i>Web Development Intern (Full Stack)</i>	Bhavnagar, India June 2023 – July 2024
<ul style="list-style-type: none">Developed and optimized responsive web applications, seamlessly transitioning from front-end design to back-end architecture using PHP and Laravel.Engineered dynamic user interfaces utilizing Livewire and AJAX, significantly enhancing user interactivity and page load performance.Designed and implemented complex database schemas using MySQL, ensuring efficient data management for scalable web solutions.Collaborated with cross-functional teams to deliver template layouts using Tailwind CSS and Bootstrap, ensuring cross-browser compatibility.	

SUMMARY

Enthusiastic ICT student proficient in C++, Python, and full-stack web development. Experienced in building scalable applications using the Laravel ecosystem and raw PHP/MySQL architectures. Proven ability to implement complex features like dynamic pricing engines, MVC patterns, and real-time search algorithms.
